DOB

Goals and Aspirations

- I plan to study Linguistics with French at university, and I'm also aiming to be able to spend a year abroad in France during or after this in order to improve my fluency and widen my knowledge.
- I have a fervent interest in mycology, particularly the study of psychedelics, like psilocybin. I've already combined my passions for language and mushrooms into an extended research project at college, and I hope to do something similar to this with my career after graduating from university.

Experience

FEBRUARY 2022 - PRESENT

Bookshop Assistant and Barista/Lionsheart Bookshop

In this role, I interact with customers daily and thus have good communication skills and patience. Throughout my employment I have had to become confident in working under pressure, dealing politely with difficult customers, delegating tasks, balancing my studies with work, stocktaking, cashing up, collaborating with other staff for projects and marketing through customer interaction.

Skills & Qualities

- Passionate
- Creative
- Empathetic
- Responsible
- Punctual
- Flexible
- Conversationally fluent in French
- Fluent in comprehension of Italian
- Excellent time management
